FUNCTIONS AND TASKS OF ONI

Direct and coordinate intelligence collection, production, dissemination, and other activities necessary to satisfy the requirements of Department of the Navy planners, operating forces and commands, the weapons acquisition community, and policy offices within the Department of Defense and national agencies.

1. <u>Intelligence Analysis and Production</u>

   a. <u>Naval Warfare Analysis</u>. Produce assessments of foreign naval strategies, doctrine, tactics, operations, combat readiness, force structure, and leadership.

   b. <u>Naval Systems</u>. Evaluate technical characteristics, performance, and vulnerabilities of foreign naval platforms; naval sensor and surveillance systems; command, control and communication systems; naval weapon systems, and emerging technologies.

   c. <u>Civil Maritime</u>. Analyze foreign maritime trade and infrastructure, proliferation of critical weapons and technologies by sea, foreign terrorist use of the seas; and support counter drug activity. Perform 24/7 maritime watch operations in conjunction with Coast Guard for timely intelligence to deployed forces, and to provide assessments of terrorist threats from civil vessels and cargo in support of homeland security.

2. <u>Maritime Intelligence Collection</u>

   a. <u>Fleet Support</u>. Guide fleet intelligence collection planning, implementation, and evaluation, and provide time-sensitive collection guidance, specialized equipment, and qualified personnel assistance. Provide development, procurement, and life-cycle support of intelligence collection sensors for special project platforms.

b. <u>Collection Management</u>. Provide Navy intelligence collection requirements management and services. Ensure Navy collection requirements are introduced into the intelligence community collection requirements mechanism, and monitor their fulfillment. Facilitate Navy-to-Navy international intelligence relationships. Manage Navy's participation in the Naval Attaché Program and Defense Attaché System. Conduct Navy-specific tactical human intelligence operations.

c. <u>Foreign Material, Technology, and Data Acquisition</u>. Acquire select foreign material and technology in support of Navy and national requirements.

3. <u>Security</u>

a. <u>Department of the Navy Sensitive Compartmented Information Program Manager</u>. Manage, implement, and oversee sensitive compartmented information programs throughout the Department of the Navy as Special Security Officer (SSO Navy).

b. <u>Installation Security</u>. Provide administrative, special, force protection, and protective security services for the National Maritime Intelligence Center. Provide administrative and special security services for the Chief of Naval Operations and Secretary of the Navy staffs in the Pentagon and Naval District Washington.

4. <u>Information Technology</u>

a. <u>Naval SCI Telecommunications</u>. Migrate and sustain the naval SCI telecommunications ashore to a robust Defense Intelligence Infrastructure-Common Operating Environment compliant network centric architecture.

b. <u>Joint Deployable Intelligence Support System (JDISS)</u>. Administer the Joint Program Management Office for JDISS, Global Command and Control System-Integrated Imagery and Intelligence (GCCS-I3), and other programs as assigned.

c. <u>Enterprise Systems</u>. Serve as the single information system security focal point for Sensitive Compartmented Information (SCI) systems. Provide Information Assurance support to the user and technical organizations of the National Maritime Intelligence Center, other Navy facilities in the National Capital Region, and manage the baseline of automated information systems.

5. <u>Infrastructure</u>. Ensure proper administration of military and civilian personnel, prudent planning, allocation, and execution of fiscal resources, along with facilities management for the National Maritime Intelligence Center.
